Arizona State University

January 2022 - Current

GPA for Last 4 Terms: **4.11** (All A+ in Relevant Coursework)

CERTIFICATIONS

HTML & CSS Specialist

JavaScript Specialist

Global Communications Badge

PROFESSIONAL SUMMARY

I am a passionate web developer specializing in front-end development, currently completing my Bachelor's Degree in Full-Stack Web Development at Arizona State University with a 4.11 GPA and all A+ grades in relevant coursework. **I am currently in my last semester and will graduate March 2025.** At Domain Driven Solutions, I design and develop multi-page client websites using Next.js, React, ShadCN, Tailwind CSS, and Vercel. I implement SEO optimization, integrate Matomo for analytics, and create brand guides for cohesive branding. Using Jira for project management, I streamline workflows with a Kanban system and have gained expertise in branch management and pull requests, ensuring efficient development processes.

WORK EXPERIENCE

Front-End Web Devloper

Domain Driven Solutions   *December 2024--Present*

- **Designed and developed** multi-page client websites using Next.js, React, ShadCN, Tailwind CSS, and Vercel, delivering high-performance, scalable solutions.
- **Implemented SEO optimization** strategies and integrated Matomo for advanced analytics, enhancing site visibility and user insights.
- **Created comprehensive brand guides** to ensure consistency across client projects.
- **Managed projects using Jira** with a Kanban workflow, improving task tracking and collaboration.
- **Gained hands-on experience** in branch management and pull requests, streamlining the development workflow.

Front-End Web Developer Intern

Global Tech   *August 2024-January 2024*

- **Developed and implemented** 5+ web projects using HTML, CSS, Javascript, and Bootstrap, ensuring responsive and visually engaging designs.
- **Collaborated with a team** of 4 to design and build fully functional websites on several occasions.
- **Certified in HTML, CSS, Bootstrap, Javascript** showcasing expertise in essential front-end development technologies.
- **Improved GitHub repository management** by documenting processes and ensuring clean reusable code.
- **Key Technologies:** HTML, CSS, Bootstrap, VS Code, Git, GitHub, Javascript
